Dear Sir:

In response to the Office Action mailed February 5, 2003, please amend the above-identified patent application and reconsider the application in view of the remarks that follow.

In the claims: /

Please amend claims 1-4, 17 and 19-22 as follows:

- 
1. (Amended) A system for determining temperature from a remote sensor circuit that includes a PN junction, comprising:
- a programmable current source that is coupled to the remote sensor circuit such that the programmable current circuit provides a bias current to the PN junction when activated, wherein the bias current has an associated level that is selected from at least a first current level and a second current level;
  - a controller configured to selectively apply:
